

Veterinary Surgical Centers Rehabilitation is the leading physical rehabilitation and pain management practice in the Washington DC metro area. We offer acupuncture, Class IV laser therapy, therapeutic ultrasound and e-stim, underwater treadmill, and much more. Our team of certified rehabilitation practitioners and therapists is dedicated to helping pets of all shapes and sizes regain mobility and quality of life following injury, illness, and other setbacks.

We primarily utilize the rear support and quad carts. They are affordable, easy to fit, and work well in our patients. I also like combining these with the Walkin' lift combo harness so that it snaps right into the wheelchair.

Julie Wentzel, DVM, CVA, CVPP, CCRT
